

# The Bar Tender for Windows

Follett Software Company introduces The Bar Tender® for Windows™. The Bar Tender for Windows is a stand alone software product featuring many flexible options that enable librarians to print "fill in" barcode labels. It is an excellent tool for replacing missing barcode labels and labels that get damaged or for printing patron barcode labels with unique information such as the patrons social security number.

**Easy to learn and easy to use.** The Bar Tender for Windows sets a new standard in creating barcodes. Now, even beginners can design professional-looking, quality labels in minutes. Create barcodes, text, and graphics quickly and easily. Also design patron ID cards and print on cardstock.

**Supports multiple barcode symbologies** including Code 39 and Codabar. Generate sequentially numbered barcodes automatically or produce labels one at a time for unique barcode ranges.

**Supports Mod 10 and Mod 43 check digit algorithms.** Check digits calculate automatically and appear on each label. No manual calculations are required.

**True display** shows exactly how labels will look, not just symbolic boxes and arbitrary bars. Different text sizes are shown properly, not as simulated thin or "blocky" lines. This true-to-print display greatly simplifies label design by showing users exactly how labels will look prior to printing.

**Numerous ready-to-print formats** make it possible to print any size barcode and any size text. Design original labels or choose a pre-designed label format. Supports all TrueType text, as well as PostScript and built-in printer fonts.

**Reads label data from external data files** such as text files from word processing, database, and spreadsheet software packages. This is helpful when printing patron labels. Also, it saves time and resources by using existing, available data files.

**Export barcodes and entire label designs** for use in other software packages. Flexible design capabilities make it easy to generate labels for multiple uses.

**Extensive "help" system** includes a variety of help topics including context-sensitive, index, keyboard, commands, and procedures. The help system serves as a valuable resource for general barcode information.

**Supports hundreds of printers,** including a variety of laser and inkjet printers. Prints in landscape or portrait mode to fit a variety of label stocks.

**Other uses** include printing additional types of labels, such as mailing, disk, and video tape labels; importing and exporting of most graphics formats including TIF, PCX, EPS, BMP, and DIB.

- ◆ Easy to learn and easy to use
- ◆ Supports multiple barcode symbologies
- ◆ Supports Mod 10 and Mod 43 check digit algorithms
- ◆ True WYSIWYG display
- ◆ Numerous ready-to-print formats
- ◆ Reads data exported to files by other programs
- ◆ Export barcodes and entire label designs
- ◆ Extensive "help" system
- ◆ Supports hundreds of printers

# The Bar Tender for Windows

## System Requirements

Windows v3.1 or greater, including Windows 95 or Windows NT.

### Minimum Requirements:

Any computer capable of running Windows with a 386 processor and 4MB RAM.

### Recommended Requirements:

Any computer capable of running Windows with a 486 processor and 8MB RAM.

## Barcodes Supported

Supports a variety of barcode algorithms, including:

### For library use:

Code 3 of 9 Mod 10  
Code 3 of 9 Mod 43

### Other uses:

Postal Barcodes  
UPC Supplementals  
and others

## Printers Supported

Supports the following printers:

**Epson**  
**Canon**  
**Okidata**  
**Citizen**

**IBM**  
**Panasonic**  
**QMS**  
**Toshiba**

**Hewlett-Packard**  
**NEC**  
**Linotype-Hell**  
**Fujitsu**
